

## Prematurity

PSY 417

Schuetze

---

---

---

---

---

## Prematurity

- Before 37<sup>th</sup> week of gestation
- 7-10% of all live births
- Extreme prematurity: Before 28<sup>th</sup> week gestation
- <http://www.youtube.com/watch?v=JsFT1xEIHzM&NR=1&feature=fvwp>

---

---

---

---

---

## Etiology

- Maternal age
- Poor nutrition
- Inadequate prenatal care
- Substance use
- Toxemia
- Previous pregnancies
- Weak cervical muscles: incompetent cervix
- Multiple births
- Maternal infections
- Congenital malformations

---

---

---

---

---

### Physical Appearance

---

---

---

---

---

---

---

### Lanugo

---

---

---

---

---

---

---

### Skin Color

---

---

---

---

---

---

---

## Complications

- Respiratory Distress Syndrome (RDS)
  - surfactant
- Bronchopulmonary Dysplasia
- Intracerebral Insults
- SIDS
- Retinopathy of Prematurity

---

---

---

---

---

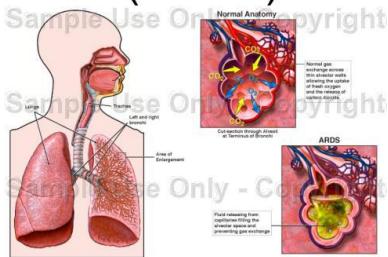

---

---

## Acute Respiratory Distress Syndrome (ARDS)

RDS

---

---

---

---

---

---

---

## Prognosis - survival

- < 800 grams
  - 1977 – 20% survival rate
  - 1990 – 40% survival rate
- > 800 grams – 90% survival
- 28 weeks – 80% survival

---

---

---

---

---

---

---

## Prognosis - developmental

- <http://www.youtube.com/watch?v=Ncxlp5e-5oU&feature=PlayList&p=96630BC69007A739&index=0&playnext=1>
- More than 50% born at 25 weeks have learning difficulties or problems with eyesight and hearing
- 12-32% - CP or MR
- 5-25% - visual impairments
- 5-12% - hearing impairments
- 20-30% ADHD
- 50% - learning disorders

---

---

---

---

---

---

---

---

## Behavioral Characteristics

- Sleep
  - Increased total sleep
  - Wake more frequently
  - 23-27 weeks
    - States are diffuse
    - Jerky movements, tremors
    - Irregular RR and HR
    - Infrequent crying
  - 30-37 weeks
    - Gradual development of quiet sleep
    - More regular respiration

---

---

---

---

---

---

---

---

## Behavioral Characteristics

- Feeding
- Reflexes
  - 28 weeks: Can elicit slow rooting, sucking, swallowing reflexes
  - 34 weeks: Become coordinated

---

---

---

---

---

---

---

---

## Brain Development

- The more premature, the slower it develops “hooks and crannies”
  - surface area for neural connections
  - 30% less gray matter (thinking)
  - 40% less white matter (fiber connections)

---

---

---

---

---

---

---
